Network Administrator Technician

Lucas Solis

Seville, Spain | 1998-2001

Leaving Certificate Equivalent

Lucas Solis

Seville, Spain | 1998-2001

SKILLS

▪ Oracle Database

▪ Oracle Exadata

▪ Oracle Linux / Scripting

▪ Oracle GoldenGate

▪ Ansible

PROFILE

Experienced Oracle DBA on versions 11g to 19c, specializing in Exadata and other Oracle engineered systems like SuperCluster and Oracle Cloud (OCI and ExaCC/ExaCS)

Working directly for some of Oracle biggest International Clients, I am committed to deliver excellent customer service ensuring high standard customer satisfaction.

With my clear logical mind and a practical hands on approach to problem solving, I can ensure that presented tasks will be handled through to completion in an efficient and professional manner.

EXPERIENCE

Oracle Database Administrator at Engineering Team

Deutsche Bank (avato consulting ag) | Edinburgh | Aug 2021 - PRESENT

My primary function within the Database Engineering Team is to design, implement, and maintain scalable solutions across key areas, including:

- Oracle Software and Database deployment
- Design and build automated Database Migration Strategies to Oracle Cloud@customer using Ansible and Automic Workflow for reliable, repeatable, and scalable deployments.
- Lead the investigation and comprehensive testing of various Physical and Logical Database Migration approaches to determine optimal strategies based on project requirements.
- Engineer and implement Oracle High Availability (HA) and Near Zero-Downtime solutions, leveraging technologies like Oracle Data Guard and Real Application Clusters (RAC) for business continuity.
- Act as the Technical Liaison with Oracle Managed Partners (MPs), specialising in complex projects involving Advanced Customer Services (ACS)/Technical Account Coordination (TAC) and Zero Downtime Migration (ZDM) initiatives.
- Develop and standardise Zero Downtime Migration blueprints using advanced Oracle tooling, specifically Oracle ZDM and GoldenGate Maximum Availability Architecture (MAA).
- Drive the current Oracle Software patching strategy, implementing and automating the deployment life cycle using Ansible for improved security and compliance.
