

VICTOR TORRES

Senior Oracle Database Engineer

📍 Edinburgh (UK) - 0750 432 66 22 / solifugo@gmail.com / [LinkedIn](#) / [DEV](#) / [GitHub](#)

PROFILE

Senior **Oracle Database Engineer** specializing in automation, **DevOps** methodologies, and cloud migrations within enterprise environments. Proven expertise in orchestrating scalable, zero-downtime solutions using Ansible and Atomic Workflow to streamline deployment lifecycles. Adept at driving **Agile infrastructure projects**, including complex **Oracle Cloud@Customer** migrations from 11g to 19c and 23ai as well as automated patching strategies. Strong technical foundation in **Oracle RAC, Exadata, and Data Guard**, blending deep database reliability with modern engineering practices.

CORE SKILLS

- **Oracle Technologies:** Oracle Database, Oracle Exadata, Oracle GoldenGate, Oracle Data Guard, Real Application Clusters (RAC), Zero Downtime Migration (ZDM), Application Continuity (AC/TAC), Maximum Availability Architecture (MAA), OEM
 - **Others:** Ansible, Bash Scripting, Linux Administration
-

EXPERIENCE

Oracle Database Administrator at Engineering Team

Deutsche Bank (AMS) | Remote Apr 2026 - Present

- Rejoined the Database Engineering Team to drive advanced infrastructure automation, cloud scaling, and database lifecycle management.

Oracle Database Administrator at Engineering Team

Deutsche Bank (avato consulting ag) | Edinburgh/Frankfurt **Aug 2021 – Dec 2025**

- Designed, implemented, and maintained scalable solutions across key areas, including Oracle Software and Database deployment of database versions 11g to 23ai.
- Designed and built automated Database Migration Strategies to Oracle Cloud@customer (EXACC) using **Ansible** and Atomic Workflow for reliable, repeatable, and scalable deployments.
- Led the investigation and comprehensive testing of various Physical and Logical Database Migration approaches to determine optimal strategies based on project requirements.
- Engineered and implemented Oracle **High Availability (HA)** and Near **Zero-Downtime** solutions, leveraging technologies like **Oracle Data Guard** and **Real Application Clusters**.
- Acted as the Technical Liaison with Oracle Managed Partners (MPs), specializing in complex projects involving Advanced Customer Services (ACS)/Technical Account Coordination (TAC) and Zero Downtime Migration (ZDM) initiatives.
- Developed and standardized Zero Downtime Migration blueprints using advanced Oracle tooling, specifically **Oracle ZDM** and **GoldenGate Microservices Architecture (MA)**.

Database Administrator for Oracle ACS (Tier 3 DBA)

Oracle (Teleperformance) | Linlithgow Jun 2014 – Aug 2021

- Oracle Software and Database deployment
- Configuration and maintenance of Data Guard Configuration
- Systems administration for customer's critical environments
